

Descarga de XAMPP

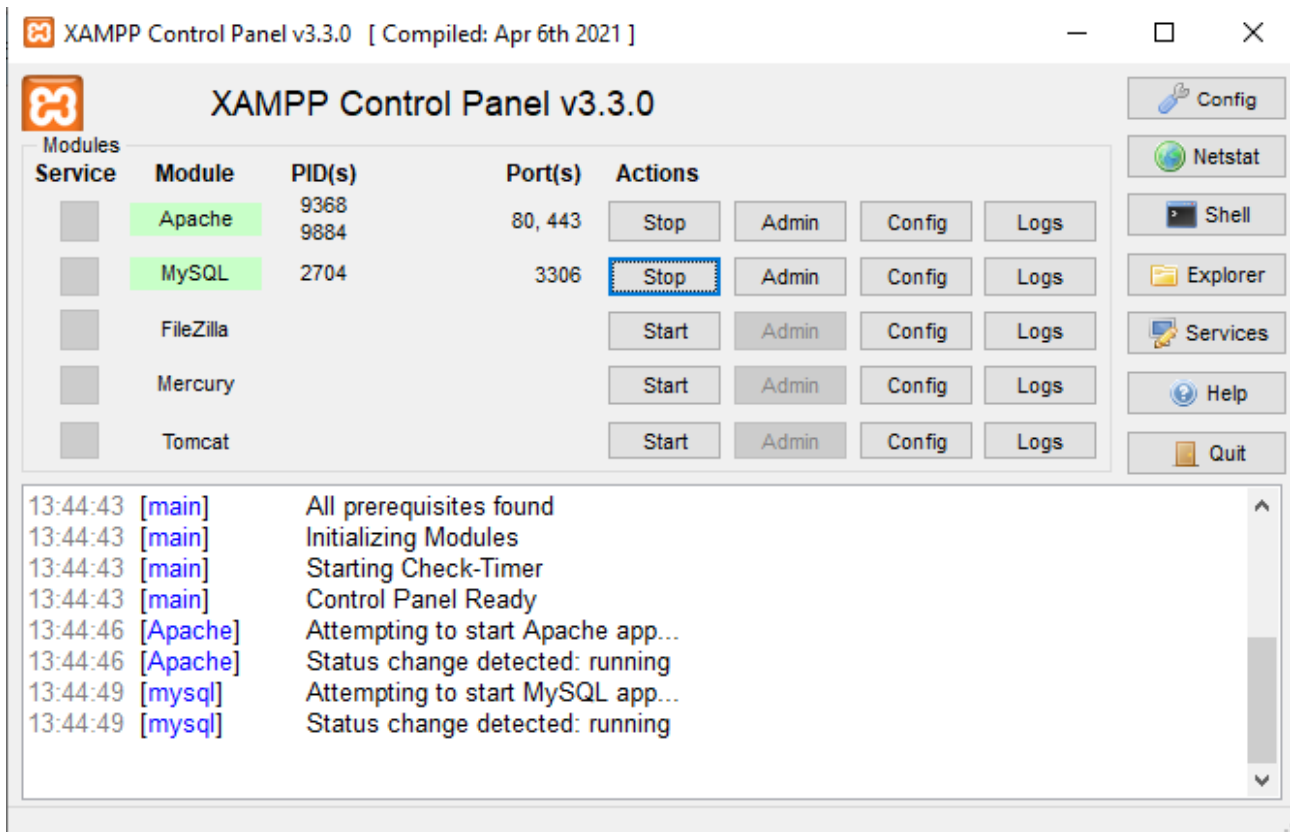

The screenshot shows the SourceForge page for XAMPP. At the top, the SourceForge logo is on the left, and navigation links for 'Open Source Software', 'Business Software', and 'Resources' are in the center. Below this, a breadcrumb trail reads 'Home / Browse Open Source / Database / Database Engines/Servers / XAMPP / Reviews'. The main header features the XAMPP logo (an orange square with a white 'X') and the title 'XAMPP Reviews'. Below the title, a subtitle states 'An easy to install Apache distribution containing MySQL, PHP, and Perl', followed by 'Brought to you by: [beltranrueda](#), [bitnami](#), [koswalds](#), [kvogelgesang](#)'. A row of statistics shows '★★★★★ 194 Reviews', 'Downloads: 582,260 This Week', and 'Last Update: 10/10/2014'. Below these are three buttons: a green 'Download' button with the SourceForge logo, a green shield icon, and two grey buttons labeled 'Get Updates' and 'Share This'. A horizontal menu bar at the bottom of the main content area includes links for 'Solaris', 'Linux', 'Mac', and 'Windows'. At the very bottom, a navigation bar contains links for 'Summary', 'Files', 'Reviews' (which is highlighted with a blue underline), 'Support', and 'Wiki'.

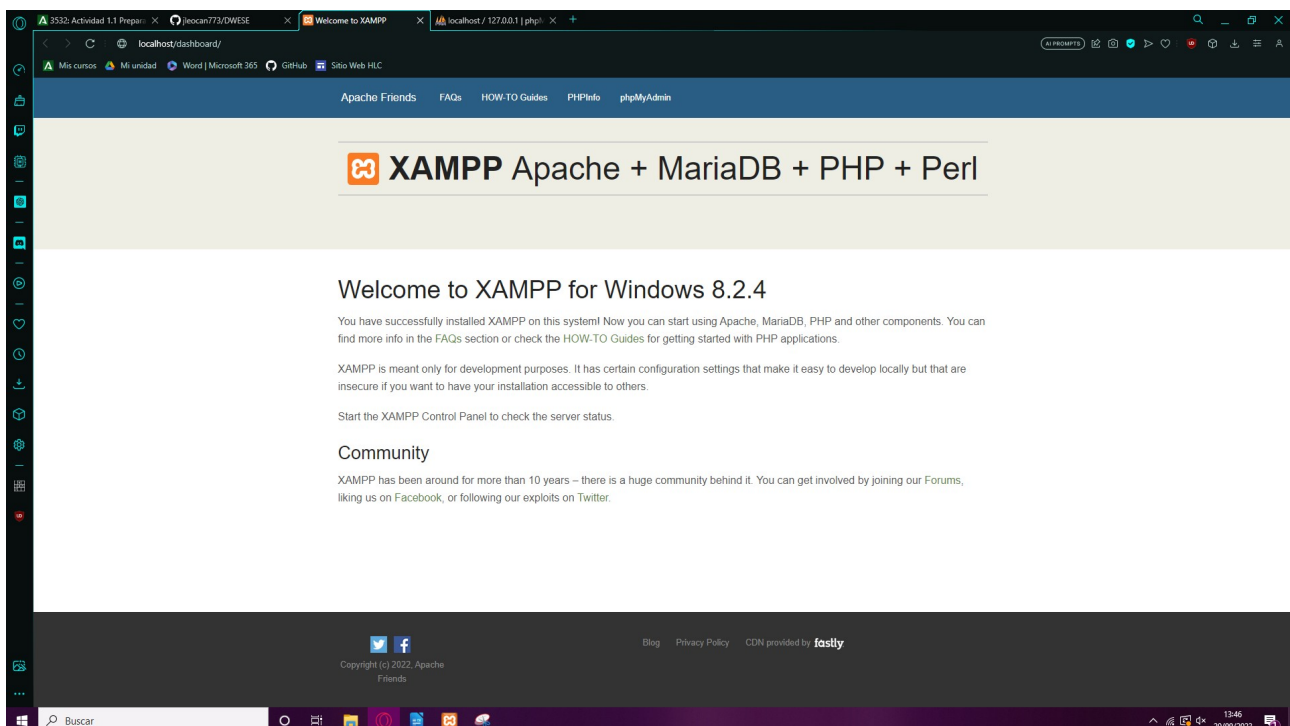

Inicio de Instalación de XAMPP

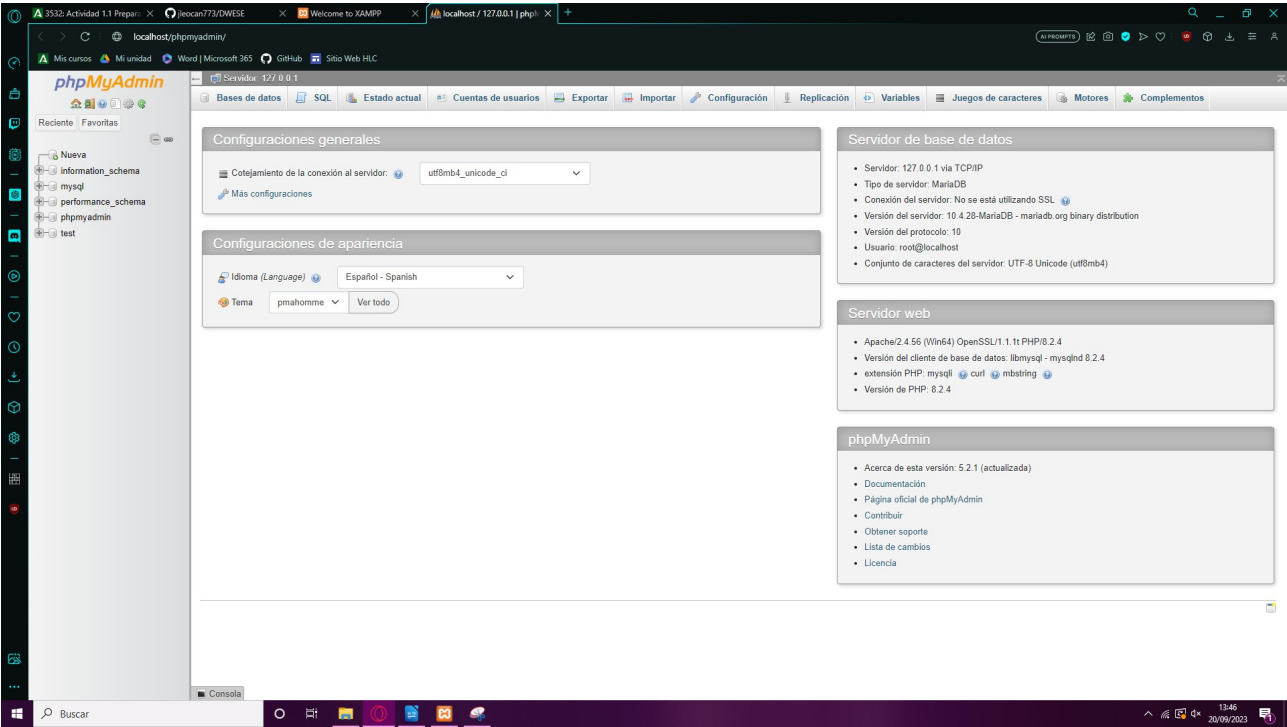

XAMPP instalado con los paneles activados

localhost/dashboard
